

# Choir Auido

## Walkthrough and Reference

### Monitoring

- Connect Aviom/ME-1 to wedge monitor via a 1/4" cable
- Use ONLY KEYS AND LEAD VOCAL this will help with feedback
- Do NOT put choir in the monitor

### Mic Placement

- Use 1 or 2 - SM137 (or PG81)
- Place  $\frac{1}{3}$  from each side (or in the middle if using 1)
- Aim down from above 2/3 of the way back

### EQ

- High Pass - Start around 160Hz and use your ears to dial in exactly where it should land. It should keep the bass, kick, and other low end out
- Low Pass - Start around 8kHz and dial it in from there. You may need more or less depending.
- Others - Use other filters to eliminate feedback

### Pan

- Pan mics L and R

### Compressor

- Don't compress choir

### **NO full claps - only very soft or "fake" claps**
