They are a chemical-free various to conventional insecticides and offer the advantage of being comparatively easy to make use of, value-effective, and environmentally friendly. Insects and bugs transmit numerous diseases, corresponding to dengue, Zika, and chikungunya, to humans. In line with the World Health Organization (WHO), greater than 700,000 deaths are recorded as a consequence of malaria, dengue, schistosomiasis, human African trypanosomiasis, [electric bug zapper](#) leishmaniasis, Chagas illness, yellow fever, Japanese encephalitis, and onchocerciasis every year. Vector-borne diseases account for more than 17% of all infectious diseases. Malaria is a parasitic infection transmitted by Anopheline mosquitoes. Around 219 million cases of the infection are recorded worldwide, leading to more than 400,000 deaths, yearly. Many of the deaths occur in kids below the age of five years. Dengue is the most prevalent viral infection transmitted by Aedes mosquitoes. More than 3.9 billion individuals in over 129 countries are prone to contracting the disease. Around 96 million symptomatic instances and 40,000 deaths are recoded on account of dengue every year.

Thus, excessive prevalence of vector-borne diseases is predicted to spur electric [bug zapper for patio insect zapper](#) market growth in the close to future. Convenience of online purchasing has made it easier for customers to purchase bug zappers without having to depart their homes. This has been particularly helpful during the COVID-19 pandemic, where folks wish to limit their exposure to each other as a lot as doable. 6.17 Trn by 2023, with e-commerce websites accounting for 22.3% of all retail gross sales. The e-commerce industry within the U.S. 875 Bn in 2022. Thus, progress in the e-commerce sector is anticipated to the fuel electric bug zapper market enlargement in the following few years. According to the newest electric bug zapper market forecast, North America is anticipated to dominate the global landscape from 2023 to 2031. Active outdoor life-style and high level of awareness about the danger of vector-borne diseases among the people are estimated to drive market progress in the area in the close to future. The sector in Asia Pacific is expected to develop at the fastest pace in the course of the forecast period. [external page](#)

Rise in incidence of vector-borne diseases and presence of main manufacturers are doubtless to spice up electric [cordless bug zapper](#) zapper market statistics within the region in the following few years. The trade in Europe and South America is anticipated to grow at a substantial tempo during the forecast period because of the surge in consumer consciousness about vector-borne diseases in these regions. The [electric bug zapper](#) market report profiles prominent vendors based on parameters reminiscent of company overview, financial overview, business methods, product portfolio, enterprise segments, and [electric bug zapper](#) current developments. DECKER, Flowtron (Armatron Company), GLOUE, HEMIUA, Koolatron, Liba USA, Livin' Well, and Woodstream Corporation are key gamers

working in this trade. Manufacturers are launching bug zappers with features equivalent to LED lights, longer-lasting grids, and larger coverage areas. They are also collaborating with online stores or [electric bug zapper](#) launching their e-portals to extend their electric bug zapper market share. Key gamers are boosting their marketing efforts to boost consciousness about the benefits of electric bug zappers and promote their merchandise.

They are partaking in marketing activities comparable to promoting in traditional and digital media as well as partnerships with retailers and influencers. In 2022, GLOUE introduced a new GLOUE [bug zapper for backyard](#) Zapper Indoor collection with UL Certification. The zapper makes use of a 360° UV mild bulb with a wavelength of 365 Nm to draw insects. In 2021, Stanley Black & Decker, Inc. announced plans to undertake the next business strategies to increase its income: Capturing growth potential in varied end-markets and [electric bug zapper](#) adjacencies, bettering profitability and return on invested capital, systematic capital allocation & steady portfolio enhancement, and portfolio improvement. The corporate additionally introduced plans to give attention to world markets and look for alternatives to penetrate new geographies. The company is aiming to amass add-on businesses, which would help strengthen its present place in the market. Includes cross section evaluation at regional in addition to country level. Furthermore, qualitative analysis contains drivers, restraints, opportunities, key trends, Porter’s Five Forces evaluation, value chain evaluation, and key development evaluation.
